Trainer Profile

8+ Yrs Exp(Manual + Automation Testing)
ISTQB, QTP, QC, Loadrunner, CMAT, SoapUI certified
Trained more than 1000 professionals

SoapUI

- Soup UI is a tool from **smartbear** for functional and performance testing of web services.
- Web services can be created either by SOAP or REST method, we can work with both.
- Latest version available is 5.1.2

Two versions available

- SoapUI - Free

- SoapUI- Pro - Paid

Workspace

- In SoapUI first we create a workspace
- Workspace is a place where all our projects will be saved
- Workspace is a single XML file, we can have multiple projects in a single workspace.
- It is similar like domain, we can have multiple projects in a single domain

Go to File → New Workspace → Give Name to that work space.

Training by Industry Working Experts, Trained more than 300 professionals 8743913121

Project

Project is the place where we are going to create our SoapUI test suites and test cases
A workspace can have any number of projects

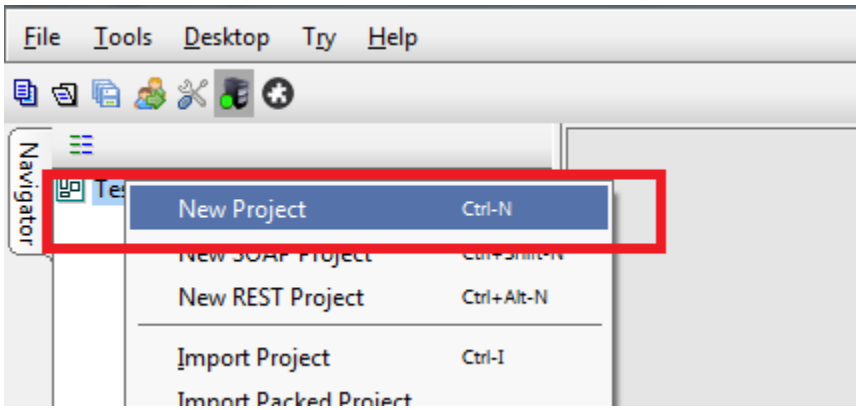
File → New SOUPUI Project or Import SoupUI Project (to open any existing project)

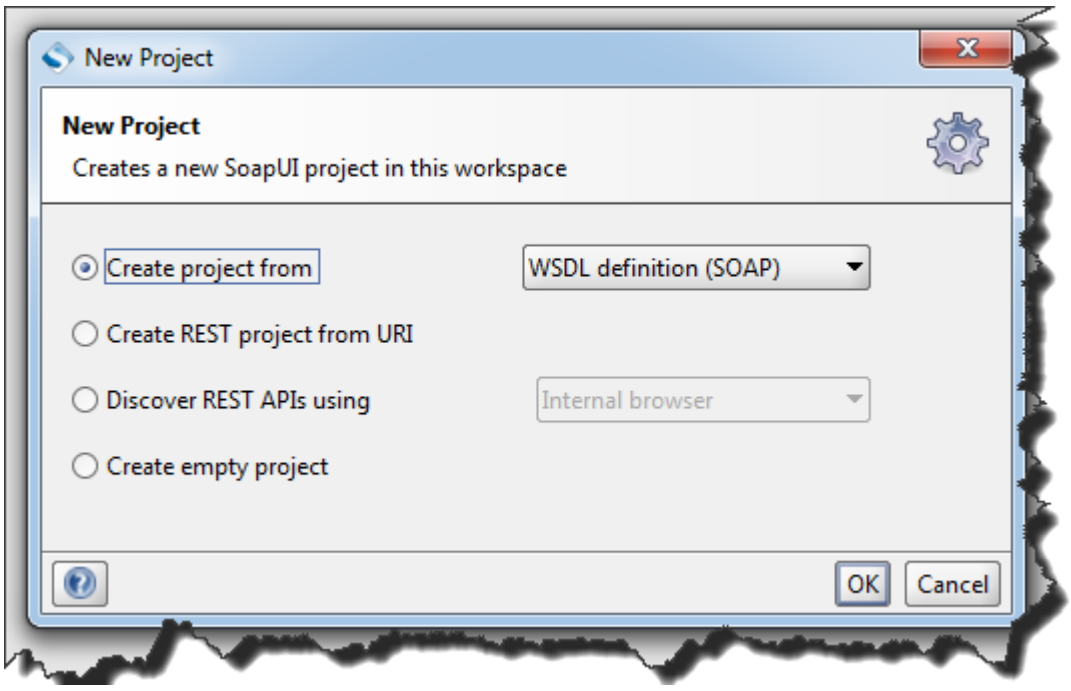
OR

Right Click on Workspace → New SOUPUI Project.

OR

We have toolbar, first option of toolbar shows icon to create project.





Project View: Display complete information regarding project

→ Double click on project
→ Project->right click-> Project View
